IRS ACCESS TO TAX ACCRUAL WORKPAPERS: LEGAL CONSIDERATIONS AND POLICY CONCERNS

INTRODUCTION

Public corporations are required by the federal securities laws1 to prepare and file with the Securities and Exchange Commission financial reports2 certified3 by an independent public accountant.4 The certification process requires the accountant to audit the corporation's books and records to determine whether corporate transactions were properly recorded5 and whether the related financial statements were prepared according to generally accepted accounting principles.6

3. Pursuant to its powers under the securities laws, the SEC promulgated Regulation S-X. 17 C.F.R. § 210 (1982). Regulation S-X is the principal accounting regulation of the SEC in its administration of the securities laws, and sets forth the requirements of certification. Id. § 210.2-02.
4. Rule 2-01 of Regulation S-X provides a statutory basis for the independence of the accountant. Id. § 210.2-01(b). The independent status of the accountant has always been an important concern of the SEC. In an early decision under the 1933 Act, the SEC stated that
[t]he insistence of the Act on a certification by an ‘independent’ accountant signifies the real function which certification should perform. That function is the submission to an independent and impartial mind of the accounting practices and policies of registrants. The history of finance well illustrates the importance and need for submission to such impartial persons ... to the end that present and prospective security holders will be protected against unsound accounting practices .... In re Cornucopia Gold Mines, 1 S.E.C. 364, 367 (1936). See generally L. Rappaport, SEC Accounting and Procedure ch. 26 (3d ed. 1972) (discussion on accountant's independence).
6. See Handbook of Accounting, supra note 5, at 9-6 to 9-8. Although the SEC has the power to prescribe the form in which the required financial information must be set forth, see supra note 2, in 1938 it voted to accept for filing under the securities laws financial statements prepared according to accounting principles for which there is “substantial authoritative support,” and that are not contrary to any express SEC position. Accounting Series Release No. 4, [1937-1982 Transfer Binder] Fed. Sec. L. Rep. (CCH) ¶ 72,005. The Commission has thus generally deferred to the accounting profession to establish standards. Handbook of Accounting, supra note 5, at 40-5; see L. Rappaport, supra note 4, at 2.5.
Statements prepared according to these principles are deemed to reflect fairly the financial position of the corporation.\footnote{7}

Generally accepted accounting principles require that the corporation account for any contingencies, the occurrence of which may result in a liability.\footnote{8} Given the complexities in the Internal Revenue Code (Code),\footnote{9} one contingency that must be accounted for is the payment of additional income tax that may be required if the corporation has taken a challengeable tax position.\footnote{10}

The financial statements

In 1973 the SEC issued Accounting Series Release No. 150, [1937-1982 Transfer Binder] Fed. Sec. L. Rep. (CCH) ¶ 72,172, reaffirming the profession’s role in setting accounting standards. This release provides that principles, standards and practices promulgated by the Financial Accounting Standards Board shall be considered by the SEC as having substantial authoritative support, and those contrary thereto to have no such support. \textit{Id.} The Financial Accounting Standards Board, established by the profession to promulgate and maintain the standards governing financial accounting and reporting, is an arm of the Financial Accounting Foundation, a non-profit corporation independent of other professional accounting organizations. Handbook of Accounting, \textit{supra} note 5, at 40-5 to 40-7.

\textit{7.} See Handbook of Accounting, \textit{supra} note 5, at 9-8, 12-2. The author gives the following as an example of what might typically be included in an accountant’s report: “In our opinion, the consolidated financial statements . . . present fairly the financial position of ABC, Incorporated and subsidiaries at December 31, 1979 and 1978, and the results of their operations and the changes in their financial position for the years then ended in conformity with generally accepted accounting principles applied on a consistent basis.” \textit{Id.} at 9-6 (emphasis in original).

FASB No. 5 requires the corporation to accrue an estimated loss from a contingency as a charge to income if the future event that will confirm the loss is “probable” (likely to occur) and estimable. If a loss is not probable, but is “reasonably possible” (more than remote but less than likely), the nature of the contingency and an estimate of the possible loss must be disclosed in the financial statements. FASB No. 5, \textit{supra}, ¶¶ 3(a)-(b), 8-10; see J. Booker & B. Jarnagin, Financial Accounting Standards: Explanation and Analysis 230-31 (1979); Ijiri, \textit{The Dilemma in Contingencies and Reporting Forecasts}, J. Acct., Nov. 1980, at 38. A “contingency” is defined in FASB No. 5 as “an existing condition, situation, or set of circumstances involving uncertainty as to possible gain . . . or loss . . . to an enterprise that will ultimately be resolved when one or more future events occur or fail to occur.” FASB No. 5, \textit{supra}, ¶ 1; see Nath, \textit{Internal Revenue Service Summons for “Sensitive” Accountants’ Papers}, 34 Vand. L. Rev. 1561, 1565-66 (1981).

\textit{9.} See, \textit{e.g.}, United States v. El Paso Co., 682 F.2d 530, 534 (5th Cir. 1982) (“The income tax laws, as every citizen knows, are far from a model of clarity . . . . [N]o taxpayer completes a return with the certainty that the IRS will agree with the bottom line . . . .”); United States v. Arthur Young & Co., 677 F.2d 211, 220 (2d Cir. 1982).

of the corporation must reflect a reserve to cover the eventuality of such contingent liability. In certifying these statements, the accountant is consequently obliged to determine the adequacy of such reserve. This process requires the accountant to evaluate the strengths and weaknesses of the positions taken by the corporation on its tax return. In so doing, the accountant makes an assessment, often on a "worst case" basis, of the possible outcome of any litigation over the challengeable positions in the return. If the accountant determines that the contingent tax liability reserve is inadequate, the corporation's financial statements must be adjusted to reflect the vulnerability of the corporation to assessment of additional tax. Should the corporate management refuse to make such an adjustment, the accountant is required to disclose the inadequacy of the reserve in his written opinion.

The workpapers generated by the accountant in the process of assessing the adequacy of the corporation's contingent tax reserve have increasingly been sought by the Internal Revenue Service (IRS or

11. FASB No. 5, supra note 8, ¶ 38; see A Balancing Approach, supra note 10, at 187-88. See supra note 8 and accompanying text.
15. See Handbook of Accounting, supra note 5, at 16-5 to 16-8; L. Rappaport, supra note 4, at 25.20-.22. The written opinion of the accountant is the certification required under the securities laws. See id. at 24.5.
Service) in conducting audits of corporate tax returns.\textsuperscript{19} Tax accrual workpapers are valuable to the Service in that the independent accountant's assessment of the corporation's tax vulnerabilities provides a definitive roadmap of the soft spots in the return.\textsuperscript{20} Additionally, the workpapers may reveal the willingness of the taxpayer to settle or litigate various positions taken on the return, giving the Service a distinct advantage in the resolution of issues raised during an audit.\textsuperscript{21}

The accounting profession has vigorously resisted the efforts of the IRS to reach these workpapers,\textsuperscript{22} viewing them as beyond the summons power provided in section 7602 of the Code because they are not relevant to a determination of the corporation's actual tax liability.\textsuperscript{23} Alternatively, the profession argues that even though the workpapers

\item[23] See infra pt. I. The summons power of the IRS is codified in I.R.C. § 7602 (1976), which provides as follows:
\begin{itemize}
\item[1] For the purpose of ascertaining the correctness of any return, making a return where none has been made, determining the liability of any person for any internal revenue tax or the liability at law or in equity of any transferee or fiduciary of any person in respect of any internal revenue tax, or collecting any such liability, the Secretary is authorized—
\begin{enumerate}
\item[1] To examine any books, papers, records, or other data which may be relevant or material to such inquiry;
\item[2] To summon the person liable for tax or required to perform the act, or any officer or employee of such person, or any person having possession, custody, or care of books of account containing entries relating to the business of the person liable for tax or required to perform the act, or any other person the Secretary may deem proper, to appear before the Secretary at a time and place named in the summons and to produce such books, papers, records, or other data, and to give such testimony, under oath, as may be relevant or material to such inquiry; and
\item[3] To take such testimony of the person concerned, under oath, as may be relevant or material to such inquiry.
\end{enumerate}
\item[] Id. The summons power of the IRS is not self-executing. If a summons is challenged,
\end{itemize}
\end{footnotes}
may be relevant and within the summons power, the judiciary should nevertheless deny enforcement of the summons for policy reasons.  

The courts that have been confronted with the enforceability of a summons for tax accrual workpapers have reached divergent results. This Note examines the issues that a court should consider in deciding whether to enforce a summons issued pursuant to section 7602 of the Code, and the policy concerns that come into play when the summons is directed at tax accrual workpapers. Additionally, this Note analyzes the Second Circuit's recent decision in United States v. Arthur Young & Co., in which the court fashioned a work-product privilege that shelters these workpapers from the Service in most instances.

I. RELEVANCE

A. The Shifting Relevance Standard

In United States v. Powell, the Supreme Court ruled that to obtain enforcement of a summons issued pursuant to section 7602, the IRS must make a preliminary showing that: 1) the investigation will be conducted pursuant to a legitimate purpose; 2) the inquiry will
be relevant to that purpose;\(^\text{29}\) 3) the information sought is not already within the possession of the Commissioner of Internal Revenue (Commissioner);\(^\text{30}\) and 4) the administrative steps required under the Code have been followed.\(^\text{31}\) Once the Service has made this preliminary showing, the burden shifts to the summonee to disprove the presence of one or more of these elements.\(^\text{32}\) Although the target of the summons will frequently allege the absence of several elements,\(^\text{33}\) the primary argument advanced to defeat a summons for tax accrual workpapers is that they are not relevant to the inquiry.\(^\text{34}\)

United States v. LaSalle Nat'l Bank, 437 U.S. 298, 316 (1978). Also, the Court has refused to draw a line barring the use of a summons issued pursuant to section 7602 merely because the taxpayer is also under investigation for criminal fraud. \textit{Id.} at 314-16; Donaldson v. United States, 400 U.S. 517, 535-36 (1971). \textit{See generally Comment, The Improper Purpose Challenge to a Section 7602 Summons, 31 Tax Law. 226 (1977).}

29. 379 U.S. at 57. See infra notes 35-41 and accompanying text.

30. 379 U.S. at 58. Courts have construed the term "in possession" literally, refusing to accept the argument that because the Service has possession of all the records of transactions from which tax accrual workpapers are derived, it has constructive possession of the information in the workpapers. E.g., United States v. Noall, 587 F.2d 123, 125 n.2 (2d Cir. 1978), \textit{cert. denied}, 441 U.S. 923 (1979); United States v. Arthur Andersen & Co., 474 F. Supp. 322, 330 (D. Mass. 1979), \textit{appeal dismissed}, 612 F.2d 569 (1st Cir. 1979), \textit{appeal of one party dismissed as moot}, 623 F.2d 720 (1st Cir.), \textit{cert. denied}, 449 U.S. 1021 (1980), \textit{aff'd as to the second party}, 623 F.2d 725 (1st Cir. 1980); United States v. Coopers & Lybrand, 413 F. Supp. 942, 950 (D. Colo. 1975), \textit{aff'd}, 550 F.2d 615 (10th Cir. 1977); see Nath, \textit{supra} note 8, at 1574 n.53.

34. Nath, \textit{supra} note 8, at 1574-75; see Caplin, \textit{supra} note 14, at 199; \textit{A Balancing Approach, supra} note 10, at 193.
The viability of this argument depends on the standard of relevance to be applied. Although the Supreme Court has not formulated a test for determining the relevance required before a summons issued pursuant to section 7602 of the Code will be enforced,35 the summons power of the IRS has been interpreted consistently as a "broad mandate, designed to give the Service the 'authority ... necessary for the effective enforcement of the revenue laws.'"36

In accordance with the view that the summons power of the IRS is to be liberally construed,37 federal courts interpreting the Powell requirement of relevance38 have considered the threshold to be a low one.39 The standard commonly employed is that the summons must seek information that "might throw light upon the correctness of the taxpayer's return."40 Certain courts have further refined this test,  

35. The relevance of the summoned documents was not at issue in Powell. United States v. Coopers & Lybrand, 413 F. Supp. 942, 950 (D. Colo. 1975), aff'd, 550 F.2d 615 (10th Cir. 1977); A Balancing Approach, supra note 10, at 194.

38. See supra notes 26-27, 29 and accompanying text.

40. United States v. Wyatt, 637 F.2d 293, 300 (5th Cir. 1981) (quoting Foster v. United States, 265 F.2d 183, 187 (2d Cir. 1959), cert. denied, 360 U.S. 912 (1960)); accord United States v. Matras, 487 F.2d 1271, 1274 (8th Cir. 1973); United States v. Turner, 480 F.2d 272, 279 (7th Cir. 1973); United States v. Egenberg, 443 F.2d 512, 515 (3d Cir. 1971); United States v. Shlom, 420 F.2d 263, 265 (2d Cir. 1969), cert. denied, 397 U.S. 1074 (1970). When, however, the summons is directed not at the taxpayer himself but at a third party, a greater showing of relevance may be required, because "judicial protection against the sweeping or irrelevant order is particularly appropriate in matters where the demand for records is directed ... to a third party who may have had some dealing with the person under investigation." United States v. Harrington, 388 F.2d 520, 523 (2d Cir. 1968); see, e.g., Venn v. United States, 400 F.2d 207, 211-12 (5th Cir. 1968); United States v. Coopers & Lybrand, 413 F. Supp. 942, 948 (D. Colo. 1975), aff'd, 550 F.2d 615 (10th Cir. 1977); cf. In re Grand Jury Subpoenas Duces Tecum Involving Charles Rice, 483 F. Supp. 1085, 1089 (D. Minn. 1979) (grand jury subpoena for tax accrual workpapers). But see Nath, supra note 8, at 1576-77 n.66 (suggesting that Harrington cannot fairly be read as imposing a higher degree of relevance for third party summonses).
requiring that the government demonstrate "a realistic expectation rather than an idle hope that something may be discovered."  

Relevance is implicit when the Service is seeking production of factual records of potentially taxable transactions. Tax accrual workpapers, however, are not records of transactions, but rather contain the thoughts and theories of the corporate taxpayer and its independent auditor concerning the tax consequences of past transactions. Although these workpapers are relevant when the Service is attempting to establish fraud, intent being an integral part of the burden of proof, relevance is tenuous when the Service is only concerned with the correctness of the taxpayer's return.

In United States v. Coopers & Lybrand, the first appellate decision on this issue, the Tenth Circuit affirmed the lower court's finding of an insufficient relationship between the "highly speculative and conjectural" tax accrual workpapers and the purpose for which they were summoned, the determination of tax liability. The court, in determining that the workpapers were not relevant, stressed that these papers had not been created or used in the preparation of tax

43. See supra notes 20-21 and accompanying text.

46. 550 F.2d 615 (10th Cir. 1977).

48. Id. at 954.
returns. In suggesting that a document's use in connection with such preparation is a touchstone of its relevance, however, the court may have been impressed by the fact that such documents implicitly (and customarily) establish the tax consequences of corporate transactions, unlike documents containing the thoughts and theories of the taxpayer and his independent auditor.

Although Coopers & Lybrand has been viewed as unduly emphasizing the fact that tax accrual workpapers are not prepared as part of the tax return process, this was not the sole basis for the court's determination that the workpapers were not relevant. Rather, the court was concerned that the Service was seeking the documents merely for their value as a roadmap through the soft spots in the return. Recognizing that relevance connotes more than convenience, the court concluded that the government had failed to establish relevance and denied enforcement of the summons. Nonetheless, the courts that have considered the relevance of tax accrual workpapers since Coopers & Lybrand have reached the contrary result.

49. 550 F.2d at 621. The court also stressed that the accounting firm had no responsibility for the preparation of its client's tax returns. Id.

50. Id.

51. See id. at 618.

53. See 550 F.2d at 620-21. The decision is frequently viewed, however, as turning primarily on this point. See United States v. Arthur Young & Co., 677 F.2d 211, 219 (2d Cir. 1982); United States v. Arthur Andersen & Co., 474 F. Supp. 322, 329 (D. Mass.), appeal dismissed, 612 F.2d 569 (1st Cir. 1979), appeal of one party dismissed as moot, 623 F.2d 720 (1st Cir.), cert. denied, 449 U.S. 1021 (1980), aff'd as to the second party, 623 F.2d 725 (1st Cir. 1980); Nath, supra note 8, at 1578.

54. See 550 F.2d at 621.

55. Id.

56. Id.

ever, although these courts nominally applied the "may shed light" test of relevance, they appear to have found the documents relevant for the convenience they represent. These courts thus may be employing an entirely different standard of relevance.

In United States v. Arthur Young & Co., the Second Circuit held tax accrual workpapers to be relevant to the Service’s inquiry, reasoning that because “[d]ifferent tax positions lead to different amounts of liability [it would be] difficult to say that the assessment by the independent auditor of the correctness of positions taken [on the] return would not throw ‘light upon’ the correctness of the return.” The court, however, did not respond persuasively to the argument that because tax liability depends not on how the taxpayer or his accountant views transactions that have already taken place, but rather on the consequences of the taxpayer’s actual transactions, the workpapers do not shed light on the question of actual tax liability. Thus, although the court’s articulated reasoning was that the workpapers meet the “may throw light upon” test of relevance, it is not clear how such papers are in fact relevant. Rather, it appears that the court considered the workpapers relevant because of the convenience that they represent to the Service. As the court itself noted, the IRS has access to all the data it needs to calculate the taxpayer’s liability, and the roadmap provided by the workpapers would “merely save the IRS some time in finding the best arguments for asserting a deficiency.”

In United States v. El Paso Co., the Fifth Circuit was similarly persuaded that tax accrual workpapers are relevant, holding that the

58. 677 F.2d 211 (2d Cir. 1982).
59. Id. at 218-19. In holding the workpapers to be relevant, the court rejected the defendant Arthur Young & Co.’s contention that because the summons was not directed at the taxpayer, but rather at a third party record keeper, a higher showing of relevancy should be required. Id. at 215-17. See supra note 40 and accompanying text. In refusing to require a higher standard, the court noted that Arthur Young & Co. had been hired to investigate the taxpayer’s financial affairs, and to involve itself in matters that were likely to be the object of a governmental inquiry. Id. at 216. There was thus no question of invading the privacy of a third party against his will. Cf. United States v. Noall, 587 F.2d 123, 126 (2d Cir. 1978) (threshold of relevance is “particularly low” when summons is directed at corporate employee), cert. denied, 441 U.S. 923 (1979).
60. 677 F.2d at 219.
61. Id. at 218.
62. Id.
63. Id. at 220.
64. Id.
65. 682 F.2d 530 (5th Cir. 1982).
66. Id. at 537-38. Although the court was concerned with a summons for tax accrual workpapers that had been prepared by the corporation itself, it employed the same standard of relevance as that employed by courts confronted with a summons seeking production of the same documents prepared by independent accountants. See id. at 534, 537.
documents may shed light on the corporation’s tax liability.\textsuperscript{67} This court also appears to have considered the workpapers relevant because of the convenience that access would represent to the Service. As the court stated: “Documents that focus and concentrate the Service’s energy on questionable positions in the return . . . are highly relevant.”\textsuperscript{68} The emphasis on the convenience these workpapers afford to the Service indicates that a standard other than “may shed light” is being used. Instead, convenience is being viewed as sufficient to establish relevance.

That Congress intended the summons power of the Service to reach non-factual documents solely because of the convenience that they represent is unlikely.\textsuperscript{69} Although the grant of power to the Service is a broad mandate,\textsuperscript{70} it is nevertheless a “limited power, and should be kept within its proper bounds.”\textsuperscript{71} Section 7602 of the Code provides that the Service may examine any “books, papers, records, or other data” that may be relevant to the inquiry.\textsuperscript{72} The phrase “other data” suggests that those books, papers and records referenced must be generally similar to “data.”\textsuperscript{73} Documents containing opinions, theo-
ries and legal analyses, rather than factual data, are therefore beyond the scope of the summons power.\textsuperscript{74}

Former Commissioner Mortimer M. Caplin recently advocated this interpretation.\textsuperscript{75} Noting that little discussion has taken place on the scope of the word “data,” Caplin argued that “[w]hat comes to mind in the use of that term are items such as books, records and other factual materials—not opinions, projections, conjectures and other thought processes.”\textsuperscript{76} While recognizing that information of the second type would be of convenience to the Service, Caplin concluded that it is dubious that Congress intended this category of work product to be readily available to the IRS.\textsuperscript{77} Moreover, if Congress had such an intent, a more likely wording of section 7602 would have provided for the power to examine books, papers, records, or other data “relevant ‘to making such inquiry’ or ‘to performing such inquiry.’”\textsuperscript{78} Accordingly, Congress used the word “‘inquiry’ not in the sense of the procedure to be followed, but rather ‘in the sense of ‘question,’ to refer to the subject matter inquired about . . . .’”\textsuperscript{79} Therefore, section 7602 permits the summoning of material relevant to the correctness of the tax return, but not material that merely facilitates the process. Because the usefulness of tax accrual workpapers lies in their convenience as a roadmap, they are beyond the summons power of the IRS.

\textbf{B. Relevance in Large Corporate Audits}

In audits of medium and large corporations, it has been argued that without access to tax accrual workpapers, the Service will be unable to perform a thorough audit.\textsuperscript{80} Accordingly, because in audits of such corporations the IRS is not seeking tax accrual workpapers for mere

\textsuperscript{74} See United States v. El Paso Co., 682 F.2d at 548 (Garwood, J., dissenting); Caplin, supra note 14, at 199.
\textsuperscript{75} Caplin, supra note 14, at 199.
\textsuperscript{76} Id.
\textsuperscript{77} Id. at 199-200.
\textsuperscript{78} United States v. El Paso Co., 682 F.2d 530, 546 n.5 (5th Cir. 1982) (Garwood, J., dissenting) (emphasis in original).
\textsuperscript{79} Id. at 546 (emphasis in original).
\textsuperscript{80} Nath, supra note 8, at 1585.
convenience, but rather out of necessity, the workpapers should be considered relevant.

While it is true that the Service has limited resources and, as a practical matter, must rely to a great extent on the integrity of the corporation's internal and independent auditors, it nonetheless has access to sufficient relevant documentation to perform such audits properly. For example, the courts have almost without exception enforced summonses for the factual audit workplans created by the independent auditor in his determination of whether the corporation's books and records fairly reflect its revenues and expenses. The Service may thus rely on the auditor's assessment of the correctness of the corporation's records and focus its energies instead on whether the tax treatment of the underlying transactions comports with the law. While access to tax accrual workpapers would certainly make the Service's task easier by focusing its attention on the transactions the accountant viewed as the subject of questionable positions, "[t]he corporation's own books and the audit workpapers furnish the IRS

81. Id. As an example of what may be involved in an audit of a large corporation, the author notes that the record in United States v. Coopers & Lybrand, 550 F.2d 615 (10th Cir. 1977), contains references to the corporate taxpayer's 3000 company computer programs, 90,000 separate accounts, and 200,000 monthly invoices. Nath, supra note 8, at 1585.
82. Nath, supra note 8, at 1585.
83. United States v. Arthur Young & Co., 677 F.2d 211, 220 (2d Cir. 1982); see United States v. El Paso Co., 682 F.2d 530, 547 (5th Cir. 1982) (Carwood, J., dissenting); Auditors Say IRS Demand for Documents is Poisoning Relations with Client Firms, Wall St. J., Jan. 15, 1981, at 25, col. 4 [hereinafter cited as IRS Demand for Documents].
85. See United States v. Arthur Young & Co., 677 F.2d 211, 221 (2d Cir. 1982); Nath, supra note 8, at 1584. In Arthur Young the Second Circuit found the audit workplans to be relevant not because of the convenience that they might represent, but rather because they do shed light on the correctness of the return: "Tax liability depends on a taxpayer's actual revenue and expenses, not on his bookkeeping. The IRS has an appropriate interest in ensuring that the latter accurately reflects the former." 677 F.2d at 216.
86. IRS Demand for Documents, supra note 83. The reporter quotes an IRS team coordinator as saying: "If we can get the papers, we can make a determination (of tax liability) much quicker . . . ." Id. at col. 6; see Caplin, supra note 14, at 194. See supra note 20 and accompanying text.
with all the raw data that it needs to calculate the taxpayer's tax liability.” Consequently, because the Service's reliance on tax accrual workpapers does not rise to the level of necessity, the workpapers do not become relevant for that reason alone. That the Service does not require these documents is further evidenced by the fact that compelled production of tax accrual workpapers is a relatively recent phenomenon. Because tax accrual workpapers do not meet the applicable standard of relevance, courts should decline enforcement of summonses seeking their compelled production.

II. POLICY

A. Threat to Financial Disclosure under the Securities Laws

Another, and perhaps more convincing argument against compelled production of tax accrual workpapers is that, should these papers be readily available to the IRS, a corporation might conceal

87. United States v. Arthur Young & Co., 677 F.2d 211, 220 (2d Cir. 1982). Although the court did not particularize the size of the audit involved in Arthur Young, the audit was clearly of the large scale that has been characterized as impossible to perform without access to tax accrual workpapers. See supra notes 80-81 and accompanying text. The subject of the audit in Arthur Young was Amerada Hess, a Fortune 500 company. The 500, Fortune, May 1982, at 258, 260. The audit covered a three-year period of operations. 677 F.2d at 214, 215 n.4.

88. See United States v. El Paso Co., 682 F.2d 530, 547 (5th Cir. 1982) (Garwood, J., dissenting) (“After all, for a great many years the Service effectively employed its summons power in routine audits . . . of large corporate taxpayers without the necessity of attempting to acquire their ‘tax pool’ analyses.”).

89. See supra notes 37-41 and accompanying text. However, the workpapers are independently relevant when the government must establish fraudulent intent. See supra notes 44, 69 and accompanying text.

90. Although the Service has recently amended its procedure manual to instruct its field agents not to routinely summon tax accrual workpapers, 1 Internal Revenue Manual (Audit) (CCH) ch. 4024.4, at 7019 (May 14, 1981), the Service does not appear to be exercising restraint in summoning these workpapers. In Arthur Young, decided over a year after the new guidelines were issued, the Second Circuit referred to the “Service’s emerging practice of requesting tax accrual workpapers.” 677 F.2d at 217 (footnote omitted). Also, as noted by former Commissioner Caplin, “[present] Commissioner Kurtz will not give up easily on this issue.” Caplin, supra note 14, at 199; see The IRS Plays Hardball, J. Acct., June 1981, at 119. Furthermore, violations by the IRS of the Manual are not considered a violation of the Powell requirement that the administrative steps required by the Code must be followed. See supra note 31 and accompanying text. The Manual's provision that tax accrual workpapers should not routinely be sought thus “provides scant protection for the taxpayer.” A Balancing Approach, supra note 10, at 195 (footnote omitted). See generally Parnell, The Internal Revenue Manual: Its Utility and Legal Effect, 32 Tax Law. 687, 699-701 (1979) (discussion of legal ramifications of the Manual).
its contingent tax liabilities from its independent auditors, thus pre-
venting the auditors from verifying the accuracy of the corporation's
financial statements.\textsuperscript{91} Because the financial statements required by
the securities laws may be the most significant element on which
investors in the financial market base their investment decisions,\textsuperscript{92} the
public interest requires that integrity in the independent auditing
process be fostered.\textsuperscript{93}

The concern that the independent auditing process, and ultimately
the integrity of the securities market, will suffer\textsuperscript{94} should the IRS have
access to tax accrual workpapers is based on the belief that the free
and candid client-auditor exchange regarding the existence of contin-
gent liabilities, which is vital to the effectiveness of the financial audit
process, is largely founded upon the client's expectation of confiden-
tiality.\textsuperscript{95} Absent such confidentiality, the client would not feel free to
reveal to his auditor the potential weaknesses in the tax return, thus
impairing the ability of the auditor to evaluate the corporation's
contingent tax reserve.\textsuperscript{96}

Whether the free flow of information between client and auditor
will in fact be hampered depends, however, on whether there are
sufficient independent reasons for a corporation to be candid with its
auditors even though the Service might gain access to the resulting
documentation.\textsuperscript{97} Corporations have an obligation under the secur-

\end{enumerate}
\end{footnotesize}
ties laws to maintain a reserve for contingent tax liabilities,98 and to cooperate with their auditors' efforts to evaluate the adequacy of this reserve. A corporation not complying with this process would be violating its obligations under the securities laws,99 a factor that in the past has prompted corporations to be candid in discussing questionable tax positions with their independent auditors. An additional incentive to be candid lies in the knowledge that an auditor, suspecting undisclosed contingent liabilities, would decline to certify the corporation's financial statements or would issue a qualified opinion.100 A corporation threatened with an "unclean" opinion arguably would prefer to be candid with its auditors even though the Service could reach the resulting workpapers. 101

The prejudice to the corporation should the Service access the underlying workpapers, however, is considerable.102 The workpapers highlight the soft spots in the return and expose the settlement and litigation positions that management is prepared to take upon challenge by the IRS.103 Divulging this information puts the corporation at such a disadvantage when audited by the IRS "that a prudent organization might not be perfectly candid with independent auditors" if such information would be reachable under section 7602.104 That

pers. Id. at 544. Initially, the court rejected the premise that corporations would flout their obligations under the securities laws. Id. See infra note 99 and accompanying text. Additionally, the court was convinced that concern about being denied certification would prompt candor. 682 F.2d at 544. See infra note 100 and accompanying text. The court was substantially in agreement on these points with the dissenting opinion in United States v. Arthur Young & Co., 677 F.2d 211, 222-24 (2d Cir. 1982) (Newman, J., concurring in part, dissenting in part). 98. Regulation S-X, 17 C.F.R. § 210.5-02(25) (1982). corporations may not be candid with their auditors is indicated by the accounting profession's deep concern that their corporate clients will not provide sufficient information to permit the evaluation of contingent tax reserves.\textsuperscript{105} Furthermore, even though the practice of summoning tax accrual workpapers is relatively recent,\textsuperscript{106} members of the profession have already noticed that clients have in fact become reluctant to discuss sensitive tax areas.\textsuperscript{107} As noted by one professional, "[e]very major corporation, faced with the thought that [its] auditors will have to make disclosures that they didn't have to in the past, is positioning itself to defend its privacy."\textsuperscript{108} Considerable evidence thus indicates that the free flow of information concerning tax contingencies will be impaired despite the independent reasons that would seemingly prompt a corporation to remain candid with its independent accountants.\textsuperscript{109} Absent such free flow of information, accountants will be unable to verify the adequacy of their clients' contingent tax reserves, with resulting detriment to financial reporting under the securities laws.

B. A Work-Product Privilege for Tax Accrual Workpapers

The Supreme Court has recognized that contrary legislative purposes may undercut the broad grant of authority to the IRS under section 7602 of the Code.\textsuperscript{110} Because it appears that financial disclosure under the securities laws will suffer should the IRS have routine access to tax accrual workpapers,\textsuperscript{111} courts considering enforcement of

\textsuperscript{105} IRS Demand for Documents, supra note 83, at col. 5; see Caplin, supra note 14, at 197 n.1, 199. Former Commissioner Caplin has noted that the American Institute of Certified Public Accountants (AICPA) has formed a special committee to deal with the problem. Id. at 197 n.1.

\textsuperscript{106} See supra note 88 and accompanying text.

\textsuperscript{108} IRS Demand for Documents, supra note 83, at col. 5 (remarks of David Bucholz, Managing Director, Tax Policy and Procedure, Arthur Andersen & Co., Chicago, Ill.).

\textsuperscript{109} See United States v. Coopers & Lybrand, 413 F. Supp. 942, 953 (D. Colo. 1975), aff'd, 550 F.2d 615 (10th Cir. 1977). The court quoted extensively the testimony of an expert witness: "[W]ith that information available to the revenue agent just for the asking, I think it would terribly impede and I think eventually destroy the system of auditing that we have established because it would eliminate the freedom that the client feels of being able to muse with us about, well, what if this capital gains is treated as an ordinary income?" Id. \textit{But see} United States v. El Paso Co., 682 F.2d 530, 544-45 (5th Cir. 1982) (court considered "wholly speculative" the argument that corporations would not continue to be candid with their independent auditors).

\textsuperscript{111} \textit{But see} United States v. El Paso Co., 682 F.2d 530, 544-45 (5th Cir. 1982) (court did not accept that the accuracy of financial reporting would suffer if tax
a summons for these workpapers should determine whether the policies of disclosure vindicated by the securities laws justify restricting the power of the Service to summon documents.\textsuperscript{112}

In \textit{United States v. Arthur Young \& Co.},\textsuperscript{113} the Second Circuit expressed concern about the effect that enforcing IRS summonses for tax accrual workpapers would have on the securities market.\textsuperscript{114} In denying enforcement of such a summons, the court balanced the Service's need for the information contained in the tax accrual workpapers against the policies of disclosure represented by the securities laws.\textsuperscript{115} While investors were found to rely "most exclusively" on the statements generated as a result of corporate compliance with the securities laws,\textsuperscript{116} the IRS was found to have access to sufficient other material to enable it to make a determination of the correctness of the tax return.\textsuperscript{117} Because the harm resulting from granting the Service routine access to tax accrual workpapers would be substantial,\textsuperscript{118} whereas the collection of revenues could continue relatively unhampered even though access is denied, the court concluded that protection must be afforded the independent auditing process.\textsuperscript{119}

To provide such protection, the court fashioned a work-product privilege\textsuperscript{120} similar to that developed for the work product of attorneys in \textit{Hickman v. Taylor}.\textsuperscript{121} In \textit{Hickman}, the Supreme Court provided the attorney with a sheltered area in which to prepare his client's case without concern that his thought processes will be discoverable by the

\end{itemize}
opposing party. Similarly, the accountant work-product privilege provides the independent auditor with a protected area in which he may freely analyze his corporate client’s contingent tax liabilities.

The accountant work-product privilege is a sound response to the concerns posed by routine enforcement of summonses for tax accrual workpapers. As structured by the Second Circuit, the privilege shelters only the work that independent auditors, retained by publicly owned companies, put into the preparation of workpapers created to assist their client’s compliance with the federal securities laws. Furthermore, the Service may override the privilege by making a showing of substantial need, such as when the corporation’s records have been destroyed by fire. The objectives of the securities laws are thus achieved without undue interference with the collection of national revenues.

The dissent in Arthur Young, however, viewed the enactment by Congress of section 7602 as preempting the power of the judiciary to restrict the summons authority beyond the “traditional” privileges to which the Supreme Court held the summons power subject in Upjohn Co. v. United States. However, Rule 501 of the Federal Rules of Evidence, which governs the existence of privileges in federal courts, provides that privileges “shall be governed by the principles of the common law as they may be interpreted by the courts of the United States in the light of reason and experience.” Congress, in enacting Rule 501, did not intend to freeze the law of privileges as then in existence, but rather intended the law to “continue to be developed by the courts.” Therefore, the judiciary has the power to recognize any new privileges that are justifiable “in light of reason and experience.” Such privileges become part of the federal common law and, under the rule of Upjohn, act to restrict the summons power of the Service. The majority in Arthur Young, having found that the integrity of the securities market would be jeopardized
if the Service could freely access tax accrual workpapers\textsuperscript{133} therefore had the power to fashion a privilege protecting them.

The dissent in \textit{Arthur Young} further criticized the privilege as facilitating duties already imposed by law\textsuperscript{134} (maintenance of accurate financial statements), whereas privileges are traditionally created to promote a relationship not already served by independent legal obligations and which would be impaired absent the protection afforded by the privilege.\textsuperscript{135} The work-product privilege, however, was not created for the purpose of protecting the relationship between accountant and client, but rather to ensure the vindication of an important public policy, the integrity of the marketplace.\textsuperscript{136} That the relationship and communications made therein are also protected is incidental. Similarly, the attorney work-product privilege was not created for the purpose of protecting non-privileged communications made to the attorney, but rather to ensure "an orderly working of our system of legal procedure."\textsuperscript{137} In each instance, it is the thought processes essential to achieve an important public policy that are being sheltered. The creation of the accountant's work-product privilege is thus a valid response to the concern that access by the Service to tax accrual workpapers will result in "inaccuracy and untrustworthiness" in financial reporting.\textsuperscript{138}

\textsuperscript{133} 677 F.2d at 220-21.
\textsuperscript{134} Id. at 224 (Newman, J., concurring in part, dissenting in part).
\textsuperscript{135} Id. In his treatise on privileges, Professor Wigmore predicates four fundamental conditions as prerequisites to the existence of a privilege:

1. The communications must originate in a confidence that they will not be disclosed.
2. This element of confidentiality must be essential to the full and satisfactory maintenance of the relation between the parties.
3. The relation must be one which in the opinion of the community ought to be sedulously fostered.
4. The injury that would inure to the relation by the disclosure of the communications must be greater than the benefit thereby gained for the correct disposal of litigation.

8 J. Wigmore, Evidence § 2285 (McNaughton rev. 1961) (emphasis and footnote omitted).

The dissent in \textit{Arthur Young} further suggested that to the extent the majority created a privilege to encourage the client to communicate with its accountant, it created a testimonial privilege for the corporation, rather than a work-product privilege for the accountant. 677 F.2d at 223 n.5 (Newman, J., concurring in part, dissenting in part). That such communications are sheltered, however, is incidental to the court's purpose.

\textsuperscript{136} 677 F.2d at 219, 221.
\textsuperscript{137} 329 U.S. at 512.
\textsuperscript{138} 677 F.2d at 221 (quoting Hickman v. Taylor, 329 U.S. 495, 513 (1947)).
CONCLUSION

The practice of summoning tax accrual workpapers poses a significant threat to the integrity of financial reporting under the securities laws. Although courts may decline to enforce summonses directed at these workpapers on the basis of non-relevance, a more effective way to ensure that the workpapers are protected is to shelter them by means of a privilege. A work-product privilege, similar to that existing for the work-product of attorneys, is a sound way to provide this protection. Such a privilege shelters the documents from the Service in most instances, thus preventing the adverse impact on financial reporting that would result from the routine enforcement of summonses. At the same time, the privilege is defeasible by the IRS upon a showing of substantial need. The integrity of financial reporting may thus be maintained by an accountant's work-product privilege without compromising the collection of national revenues.

Katherine Pryor Burgeson
